Script ?

```
1 pipeline {  
2   agent any  
3  
4   parameters {  
5     string(  
6       name: 'GREETING_NAME',  
7       defaultValue: 'World',  
8       description: 'Enter the name to greet'  
9     )  
10  }  
11  
12  stages {  
13  
14    stage('Greeting') {  
15      steps {
```

[try sample Pipeline...](#)

☒ Use Groovy Sandbox ?

Add parameters block + Greeting stage — Updated the pipeline script to include a parameters block defining a string parameter GREETING_NAME (default World), and added a new Greeting stage that echoes Hello \${params.GREETING_NAME}.
